WHERE CAN SOUTHERN RIVER OTTERS BE FOUND?

They are found in Patagonia, Argentina and Chile. Although called river otters they can also live in a marine environment.

DID YOU KNOW?

These otters are considered a very close relative of the North American River Otter

SOUTHERN RIVER OTTERS ARE **ENDANGERED**!

They are the most endangered otter of the New World or South America

An increase in tourism and human activity means habitat loss for the otters.

Wild dogs might kill an otter or give it a nasty disease.

WHAT DO SOUTHERN RIVER OTTERS EAT?

Southern River Otters eat a lot of fish and shellfish but when given the chance they might eat birds and small mammals.
